Engines price the entrant; the trained worker is behind the wall
Computers price the entrant; the trained worker is behind the wall
Both at the wall: wages shaped by land access and labor scarcity
The wall reaches trained tasks: both margins contestable
Relative human productivity $y(x)$
Tasks x, each schedule ordered by its worker's y; closed tasks last
pre-industrial (to about 1780)
industrial (1780–1950)
computing (1970–2020)
